ROBERT MCBRYDE

SOFTWARE DEVELOPMENT COACH

Experienced Software Engineer and Developer in Test with a 2:1 degree in Computer Science and 16 years industry experience.

EXPERIENCE

Software Dev/Test Coach - Registers of Scotland
since January 2020

Deliver hands on coaching for the IT Dev community through workshop creation, one-to-one development mentoring sessions and ownership of the testing Community of Practice. Collaboration with fellow coaches and agile product teams to improve the ability to deliver via a DevOps mindset. Involved in the ongoing development of the RoS "grow our own" programme contributing to the creation of the "learning pathways" and multiple initiatives to inspire personal growth within the IT Dev community. Assisting with internal and external recruitment within IT Dev.

Senior QA/Dev in Test - Registers of Scotland
February 2018 - December 2019

Assisted in the design and implementation of modern test automation practices within the Mapping domain and provided coaching to junior developers. Contributed to the delivery of an automated pipeline for new APIs and ETL processes. Encouraged collaborative working via pairing, mobbing and promoting the division of work into small deliverables to enable increased frequency of deployments.

Software Engineer - Yavi
July 2015 - January 2018

As a founding member of Yavi, my role involved a wide variety of responsibilites in addition to the daily engineering of our products. I was actively involved in the QA within our agile team and oversaw the QA hiring process within the company. We operated using the Lean Startup Methodology to deliver iOS and Android apps hosted in AWS on Java backend with accompanying Angular web clients.

Software Engineer - Kotikan
December 2013 - July 2015

I worked on numerous web and mobile projects for a diverse client base as part of Kotikan, an award-winning app development agency. Product teams operated using Scrum, utilising TDD, BDD and the use of SOLID principles across codebases. Technologies included Java, SQL, Apache
